DESIGN STUDIES

Index to Volume 7, Numbers 1–4, 1986, pp 1–240

SUBJECT INDEX

A

Action research 192
Action research in information systems design 192
Aldo Rossi, architect, scientist – a storm of silence . . . an architect of alienation 58
Alienation 52
Analysis-synthesis 20
Architects 52
Architectural design 153
Architectural practice 178
Architecture 53, 116, 133, 167
Artistic elite 31
Autonomous 58

B

Books and publications

Bayley, S The Conran directory of design 117
Begg, V Developing expert CAD systems 115
Cross, N (ed) Development in design methodology
Faulkner, W and Arnold, E (eds) Smothered by invention: technology in womens lives 117
Groover, M P and Zimmers, E W CAD/CAM: Computer-aided design and manufacturing 52
Hall, P (ed) Technology, innovation and economy policy 235
Heath, T Method in architecture 52
Hiller, B and Hanson, J The social logic of space 54
Holt, K, Geschka, H and Peterlongo, G A key to user-orientated product assessment 53
Johne, F A Industrial production innovation: organisation and management 115
Langdon, R and Roswell, R Design and innovation: policy and management 235
Lorenz, C The design dimension 116
Oakley, M Managing product design 50
Pahl, G and Beitz, W Engineering design 53
Passini, R Wayfinding in architecture 114
Rickards, T Stimulating innovation: a systems approach 114
Scott, P The robotics revolution
SERC Engineering design working party 55
Wood-Harper, Antill and Avison Information systems defusion: the multiview approach 234
Building evaluation 2
Business of design management 106

C

Clients and users 178
Computerization 80
Computer-aided architectural design 94
Computer-aided design 53, 178, 199
Concept of participation 153
Creative philosophy applied to the design of process plant 216

Conference and Exhibition Reports

British youth culture 233
Engineering Design 228
ICED 85 International conference on engineering design 111
Innovation through co-operation with research organizations 48

D

Decision making 199
Decision-making in neighbourhood design and development 163
Design 199
Design activity models: worldwide emergence and convergence 167
Design as exploration 67
Design competence 14
Design epistemology 2
Design intelligence: the use of codes and language systems in design 14
Design management teaching 106
Design methodology 199
Design models 167
Design participation: new roles, new tools 125
Design process 67
Design strategies 20
Design theory 185
Designer and user needs 53
Designing variations 185
Digital typography 87
Drawing 20

E

Engineering 40, 117, 153, 167
Engineering design 20, 216
Engineering of meaning: lessons from Las Vegas recalled and declined 31
Evolution of industrial building 144
Exploration 53

F

Flexibility 185

G

Glass making 216

H

Hemispheric 14
Housing 125

I

Improving the legibility of digital type: a comparison of some current videotex fonts with a new design 87
Industrial design 175, 185
Industrialized building 144
Information systems 80, 192
Informed, well ordered and reflective: design inquiry as research 2

K

Knowledge engineering 94

L

Lateralization 14
Legibility 87

M

Meaning 31

N

Non-verbal languages 14

P

Participation 125, 139, 153, 163
Planning 163
Planning processes 2
Populist 31
Positivism 31
Process plant 216
Professions 133, 139
Prolog 94

R

Reasoning systems 94
Research and development 178
Resignation 58
Role of the professional: an engineer's perspective 133

S

Social impacts of computer-aided architectural design 178
Survey of research and studies on design 199
Systems analysis 80, 192
Systems design 192

T

Technological change 144
The information systems design process: many views of one situation 80
Thinking styles and modelling systems 20
Topology 94
Topology–1: a knowledge-based system for reasoning about objects and spaces 94
Towards a new professional role 139
Tricycle 40
Tricycle turns turtle: a case study of defective engineering design 40

U

User requirements 80

V

Variation 185
Videotex 87
Visual thinking 20

AUTHOR INDEX

A

Akiner, V T Topology 1: a knowledge-based system for reasoning about objects and spaces 94
Antill, L Action research in information systems design 192
Antill, L The information systems design process: many views of one situation 80

B

Bromberg, P The evolution of industrial building 144

C

Carp, J C Design participation: new roles, new tools 125
Cross A Design intelligence: the use of codes and language systems in design 14

G

Gibson, T Decision-making in neighbourhood design and development 163
Gorb, P The business of design management 106

H

Habraken, N J Towards a new professional role 139
Happold, E The role of the professional: an engineer's perspective 133
Hillman, J, Shyles, L and Ichiyama, D Improving the legibility of digital type: a comparison of some current videotex fonts with a new design 87
Homer, G S see Martin, P 216

I

Ichiyama, D see Hillman, J 87

L

Lipman, A and Parkes, P The engineering of meaning: lessons from Las Vegas recalled . . . and declined 31
Lipman, A and Surma, P Aldo Rossi, architect, scientist – a storm of silence . . . an architecture of alienation 58

M

Martin, P and Homer, G S The creative philosophy applied to the design of process plant 216
Maver, T W Social impacts of computer-aided architectural design 178

O

Oxman, R M Designing variations 185

P

Parkes, P see Lipman, A 31
Pugh, S Design activity models: worldwide emergence and convergence 167

R

Robinson, J W Design as exploration 67

S

Shyles, L see Hillman J 87
Spencer, J R and Stewartson, R A tricycle turns turtle: a case study in defective engineering design 40
Stewartson, R see Spencer, J R 40
Surma, P see Lipman, A 58

T

Tempczyk, H A Survey of research and studies on design 199
Tovey, M Thinking styles and modelling systems in design 20

W

Walters, R J Informed, well ordered and reflective: design inquiry as research 2
Wulz, F The concept of partipation 135
